13 March 1956

Hurt -

Enclosed is Amendment No. 6 which covers outstanding proposals, most of which I have previously approved in telephone conversations with you during the past several months.

Still outstanding is the proposal for production of System 3 and the necessity for production of System 2 items and R & D work on a prototype of System 4 - with subsequent production thereof. These will be covered in subsequent amendments to follow very shortly. In some instances proposals are required on some of these items.

However this Amendment 6 will cover you for a while and vouchers should continue to be processed in connection with the whole program.

Will you have the original and two copies of Amendment 6 signed and the original and one copy returned as soon as possible.

Thanks

George
